

Dr. Nanxi Li

China Telecom Research Institute, China

Bio: Nanxi Li received his Ph.D. degree in information and telecommunication engineering from Beijing University of Posts and Telecommunications in 2018. He has been with China Telecom Research Institute since then, working on 5G standardization in 3GPP RAN1 and 6G promising techniques. He has invented or co-invented about 50 filed/granted Chinese patents, and co-authored 1 book. He is now a senior engineer, and his main research areas include 5G physical layer technologies, MIMO and reconfigurable intelligent surfaces. And he is currently the rapporteur for the 3GPP Rel-18 further NR coverage enhancements work item.
